Hazardous Weather

Critical fire weather conditions are expected today, especially for the eastern and central Panhandles. Please restrict activities that cause sparks or flames.

A Red Flag Warning is in effect for today for critical fire weather conditions generally along and east of a Tulia to Aspermont line.

Hazardous Weather

Elevated Fire Weather

This Afternoon

Weather Forecast Office
Midland/Odessa, TX
Issued April 7, 2022 3:10 AM CT

A Fire Danger Statement has been issued for this afternoon for Southeast New Mexico, the Eastern and Central Permian Basin, the Lower Trans Pecos, Culberson County, the Davis Mountains, Marfa Plateau, and Big Bend Region.

Thursday

Cooler temperatures behind a backdoor cold front

Weather Forecast Office
El Paso, TX
Issued Apr 06, 2022 6:44 PM MDT

Cooler temperatures are expected on Thursday behind a backdoor cold front. Afternoon temperatures will be around 10 degrees cooler than on Wednesday. This will result in seasonal to slightly below average temperatures. Winds will be generally from the east and northeast between 10 to 20 mph with stronger winds possible in the western slopes of area mountains. Skies will be sunny to mostly sunny.

Hazardous Weather

A Red Flag Warning is in effect from 10 am to 8 pm today for areas along and west of I-35. Temperatures in the upper 60s to low 70s, relative humidity values around 10-15%, and northwest winds around 25-30 mph with gusts up to 45 mph will result in critical grass fire danger. Avoid outdoor activities that could start grass fires, as any fires that develop will be capable of spreading quickly.

A Red Flag Warning means that critical fire weather conditions are expected, while a Fire Weather Watch means that there is a potential for critical fire weather conditions. A combination of low relative humidities (between 15 and 25 percent,) gusty northwest winds (15 to 25 MPH with gusts to 30 MPH,) and relatively dry ground conditions with dry fuels can combine to contribute to extreme fire weather behavior. Any fires that develop will likely spread rapidly. Outdoor burning is not recommended!

Hazardous Weather

Dry air and gusty NW winds will lead to critical fire weather conditions today. A Red Flag Warning is in effect across the entire region from 10 AM to 7 PM CDT. Be careful with grills or anything that might start a fire outdoors.

Very dry conditions with relative humidities 10 to 25% and northeast winds up to 25 mph has led to critical fire danger conditions and a Red Flag Warning across the Coastal Bend, Islands, and portions of the Coastal Plains. Elevated fire danger conditions and a Fire Weather Watch remains in effect for the Brush Country and Rio Grande Plains where winds are lighter but relative humidity plummets to 5 to 10%.

Hazardous Weather

A Red Flag Warning is in effect from 10 AM to 7 PM today for Kenedy, Willacy, and Cameron counties. Moderate northeasterly winds are expected through the afternoon, with relative humidity values dropping into the teens inland and below 45% on the island. A Fire Danger Statement has been issued for the remainder of Deep South Texas with relative humidity values ranging from single digits to teens and 20 foot winds generally remaining below 15 mph. Burning of any kind should be avoided.

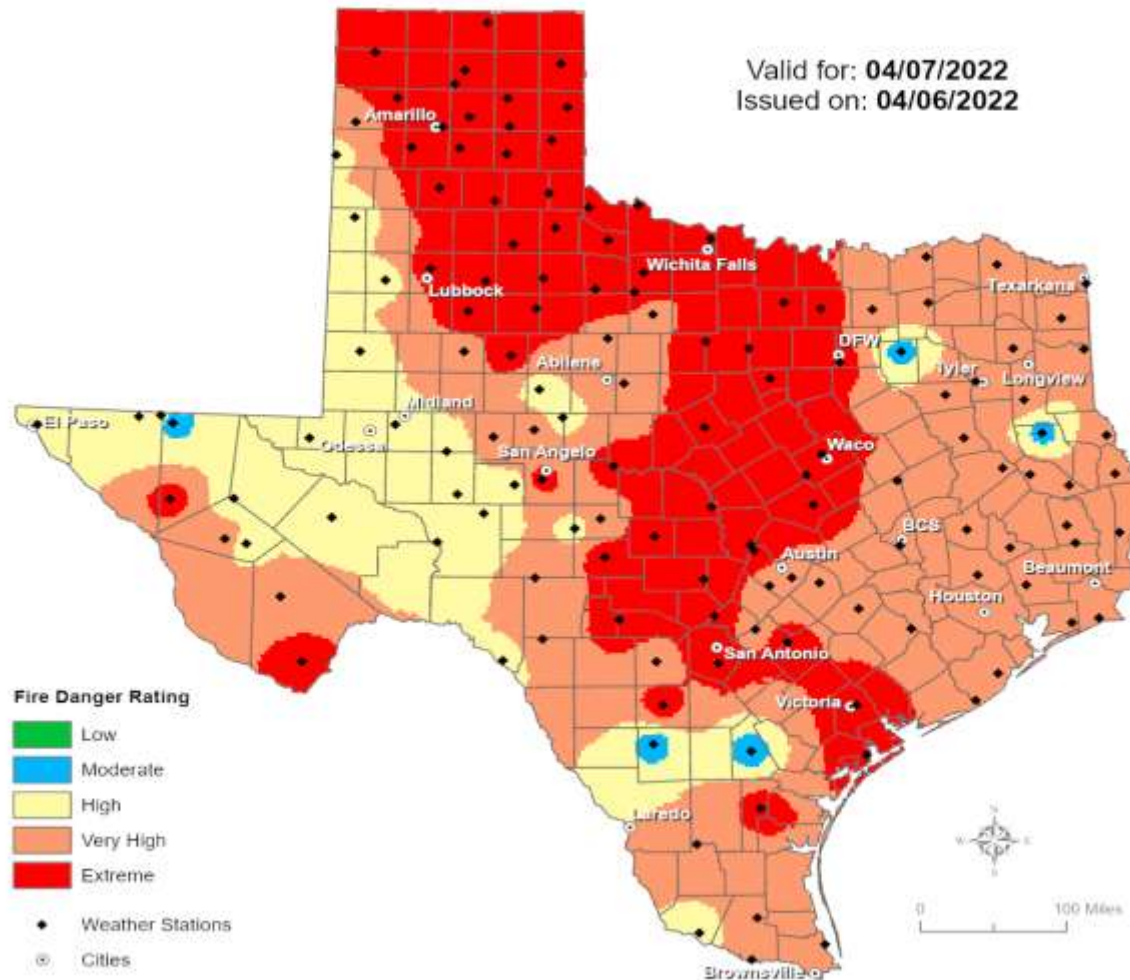

Weather Warnings/Advisories Issued

DATE	WARNING TYPE	LOCATION
